All Wired Up!

The 5,200 square foot addition to building 2 is a reality at last! Instructors have moved into new offices, cosmetology customers are welcomed by a new reception area, the computer maintenance room has been wired, and computers have been moved into four new classrooms which will soon be occupied by students.

"All business computer classes will be held in the new labs by the beginning of spring quarter at the latest," says David Jones, Chairman of the Business Division. The police science program will also move into the building soon. "This is the first time in the 25 year history of the college that the Business Division has had the advantage of being housed in one location, and it is great," Mr. Jones remarked.

As a result of this addition, the CAI lab will soon move to building 1 and the media office to the lower level of building 5. The fiscal affairs offices will move upstairs in building 1, and the SGA office will move into the trailer behind building 1. Funding for the addition to building 2 was made possible by support of the 1990 bond referendum. The Business Division would like to thank the following students for helping wire the computer labs and move into the new addition of building 2: Idona Jackson, Juanita Norman, Donald Price, Ronald Price, Dave Renesak, Chana Smith, Pam Smith. You've been a great help!

"Has Anyone Seen Chuck Hauser?"
