Tri-County Cable TV Installs Cable

This fall, students at Beaufort County Community College have access to cable television in their new student lounge, compliments of Tri-County Cable TV. When the student lounge opened last spring in the new Student Services/Science Classroom facility, game tables and a television for the lounge were purchased through student activity fees. Tri-County Cable TV, based in Belhaven, then offered to install fiber optic cable directly from Highway 264 to the BCCC student lounge. The company also offered to provide the monthly cable service to the lounge at no charge. The project was completed in August.

Sue Brookshire, who coordinates BCCC student activities, says the students are excited to have access to cable programming in the lounge. "On behalf of the student body, the Student Government Association extends its appreciation to Mr. Wallace for making this service possible," says Ms. Brookshire.

Tri-County Cable lays cable on campus.
